

WEEK-2 MODULE 2 WORK

Name: Sanskruti Ghavghave (B24CE1092), Uday Pawade (B24CE1088)

Our part has three major components:

1. Authentication and role-based access
2. Database design for users and assets
3. Asset barcode generation and printing

AUTHENTICATION:

WHO ARE YOU? Will be answered

Email/Username + Password -> Verify user -> Login

AUTHORIZATION:

WHAT ALL ACCESS DO YOU HAVE?? Will be answered

Role	Permission
Asset Admin	Create/edit assets, generate labels
Department Head	Approve transfers/disposal
Scanner Operator	Scan and verify assets
Auditor	Perform verification/audit
Staff	View assigned assets

FLOW OF HOW AUTHENTICATION WILL WORK:

User enters email + password -> Backend receives credentials -> Find user in Users table ->

Compare entered password with password_hash -> Check account status -> Identify user's role -> Create login session/token -> Give access according to role

Login page:

Department Asset Tracking

Secure asset management and barcode-based tracking for departments, staff and auditors.

- ✓ Secure Authentication
- Barcode Asset Tracking
- Asset Lifecycle Management
- Role-Based Access
